Why did we build it?

30% of government services take payments.

But paying government is often too difficult for the user, and hard to manage for the service.

Make it easier for users

Fully accessible and user tested services

Take payments quickly

Use GOV.UK Pay and be ready to take online payments in minutes

Set up online payments quickly and with no technical knowledge required

Manage your payments easily

Take payments, issue refunds and run reports on your payments

Security is built in

GOV.UK Pay is robust, secure and fully Payment Card Industry (PCI) compliant

Used across the public sector

Partners from right across the public sector are already using GOV.UK Pay, including the central government, NHS, police and local authorities

Architecture

Reporting via the GOV.UK Pay API

Before reading this section, you should be familiar with the "Making payments" section.

You can get data from the GOV.UK Pay API in a format suitable for automatic processing. For example, you could develop software to query the GOV.UK Pay API for payment data periodically, and import the data into your finance system. This could remove routine manual operations from your workflow, and lead to significant cost savings for your organisation.

You can use the GOV.UK Pay API to:

- get information about a single payment
- generate a list of payments matching search criteria

Get information about a single payment

```
GET /v1/payments/paymentId
```

Cost

There is no charge to use GOV.UK Pay.

You continue to pay the transaction rates of the Payment Service provider.

creating a Direct Debit online
Bracknell-Forest.gov.uk
GOV.UK Pay
DD supplier
I want to setup a DD
goes to Bracknell Forest site, chooses service, selects DD subscription
makes API call to GOV.UK Pay with reference, DD schedule + amount, return URL, description
user is returned to end service page
collects sort code, account number, name, email from user
AND
sends emails to user - mandate confirmed, advance notification of payment
sends mandate request and payment request to DD supplier
receives notifications from DD supplier - transaction events updated on self-service; webhook notifications sent to your service
processes requests with bank, notifies GOV.UK Pay with events (mandate confirmed etc)

Self Service Payment Links

Create a payment link
Manage payment links

Set payment link information

Title

Briefly describe what the user is paying for. For example, “Pay for a parking permit”.

Pay for example service

The website address for this payment link will look like:

https://www.gov.uk/payments/govuk-pay-live/pay-for-example-service

Details (optional)

Give your users more information. For example, you could tell them how long it takes for their application to be processed.
